

ILLINOIS GREEN SCHOOLS PROJECT

Sponsor the 2020–2021 Illinois Green Schools Project!

Support Illinois teachers and students on their sustainability journey.

About the program

The Illinois Green Schools Project is a challenge for K-12 schools to devise and implement creative low to no-cost energy, water and waste initiatives, and sustainable practices.

Participating schools gain access to tools, resources, and a Green Schools Mentor to provide guidance and support throughout project implementation.

2020 – 2021 Impact

Your sponsorship is critical and will provide resources for:

- » Individual school green teams working to educate students and take action on a sustainability project in their virtual classroom or at the school building
- » Classroom resources on environmental science and sustainability best practices
- » An annual event to celebrate and provide public recognition of the innovative projects
