

# Neighborhood Power Project

Empowering nonprofits in the clean energy revolution

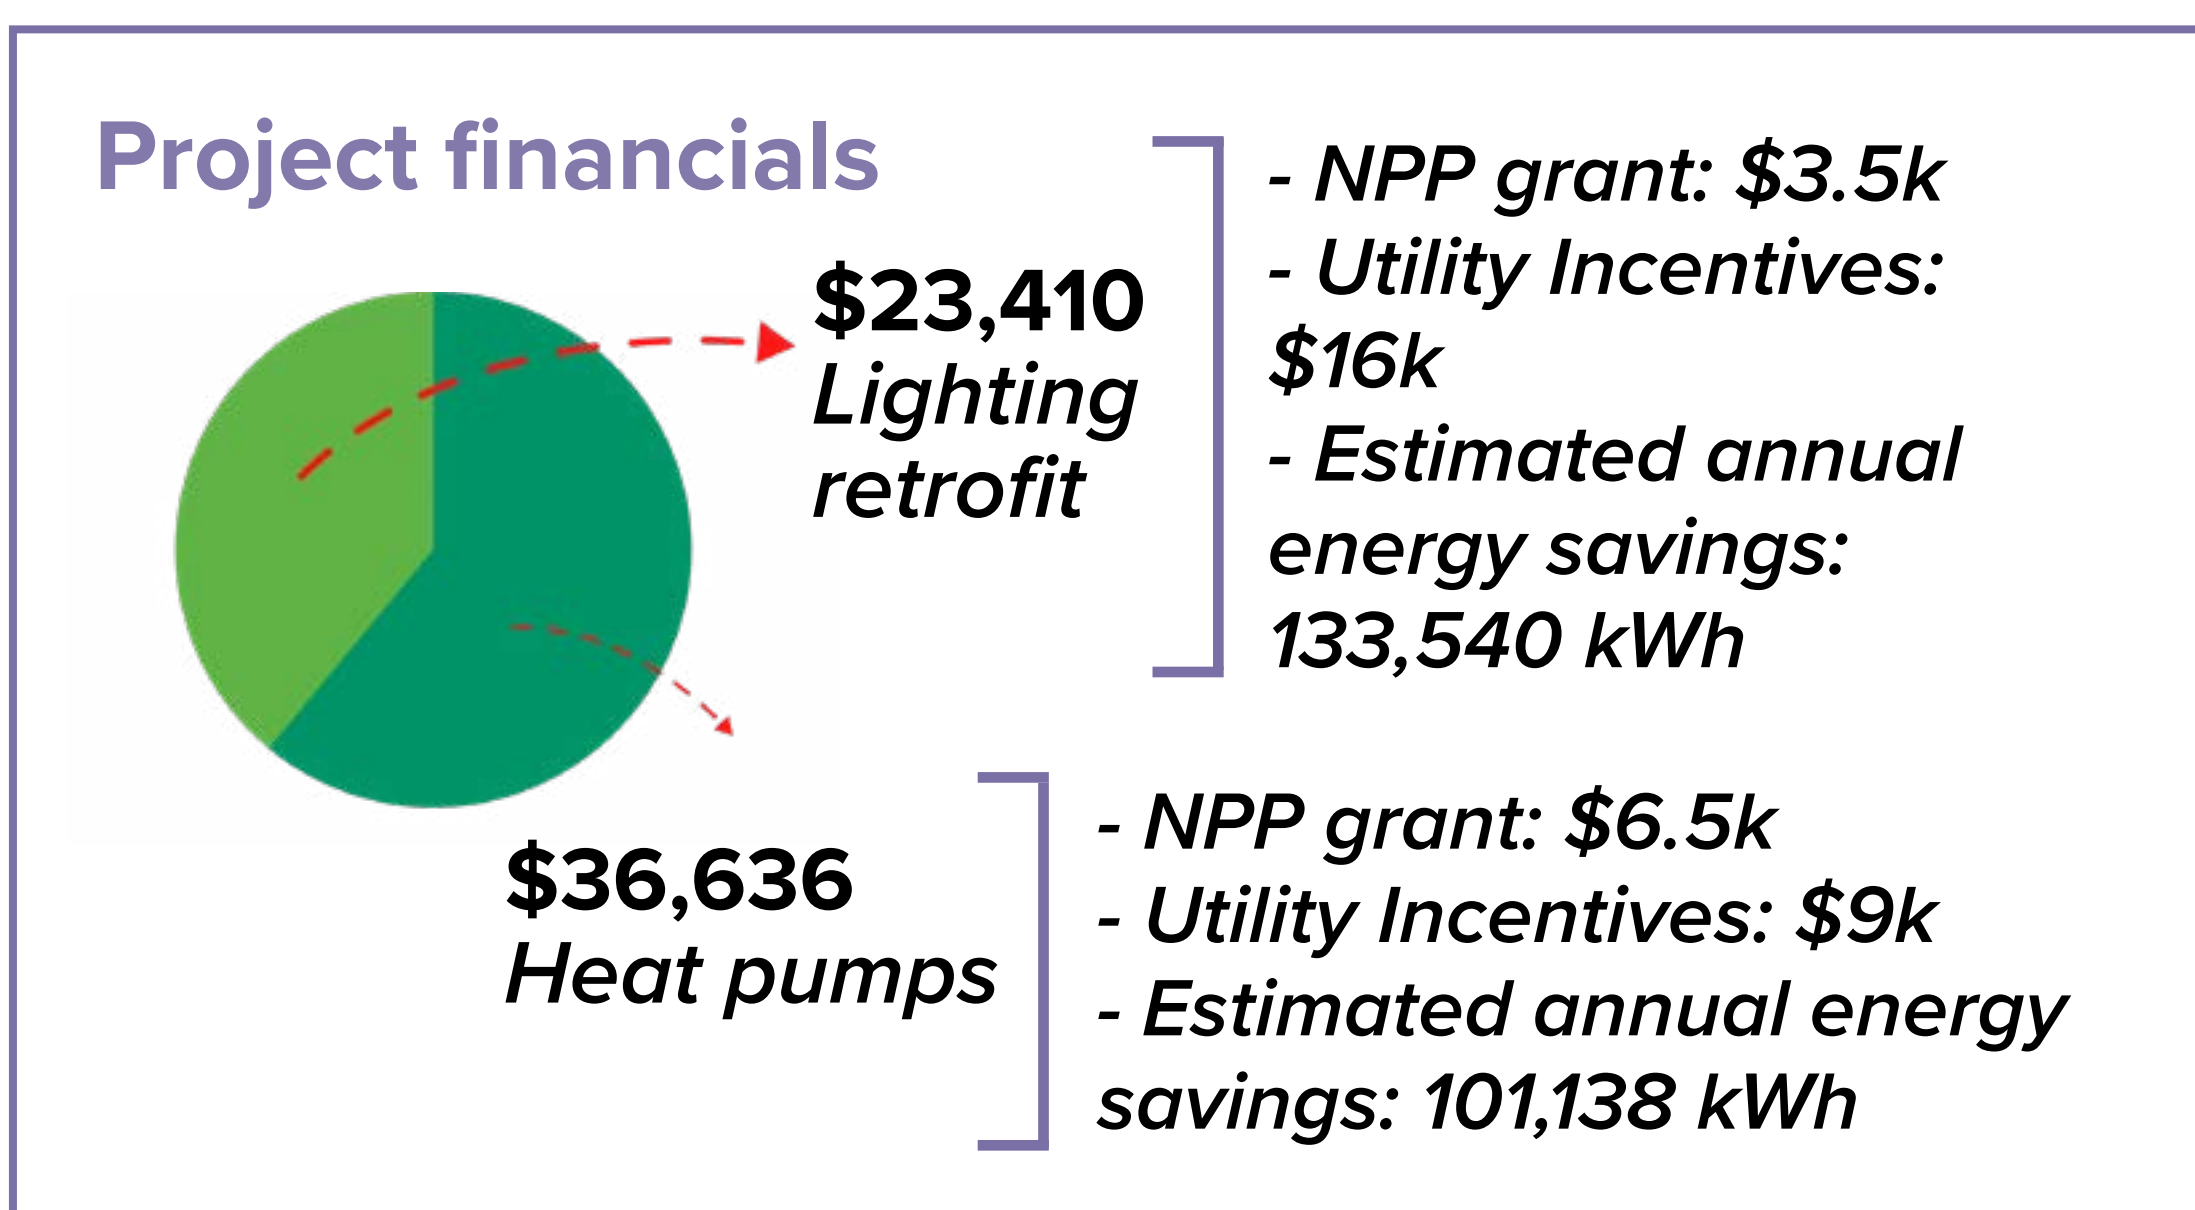

*SOUL prioritized integrating their sustainability goals with the mission of increasing the comfort and functionality of their workshop and classroom spaces.*

SOUL programs are focused on empowering returning citizens, foster care alumni and women entering the construction industry.

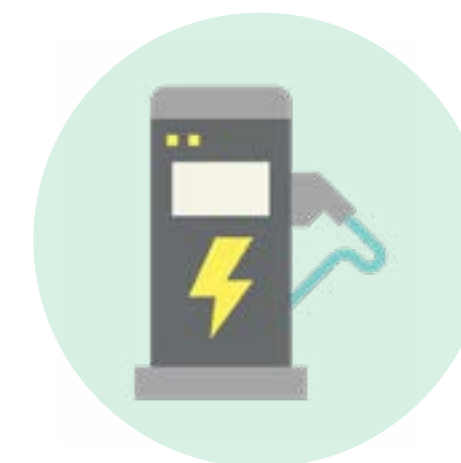

## SOUL Project Summary

Sustainable Options for Urban Living (SOUL) is a nonprofit community organization that provides accessible and functional workforce training in construction trades and infrastructure building.

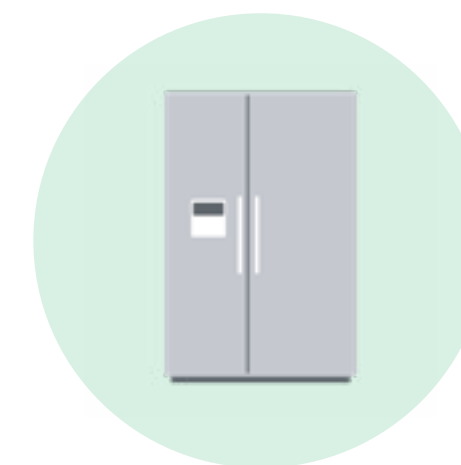

SOUL's sustainability projects will save the organization on their energy bills, helping them to pursue their mission of providing high-quality programming to any and all Chicagoland residents in high-quality spaces.

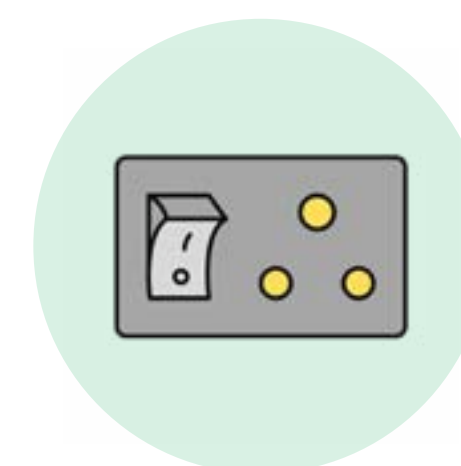

### Energy saving improvements

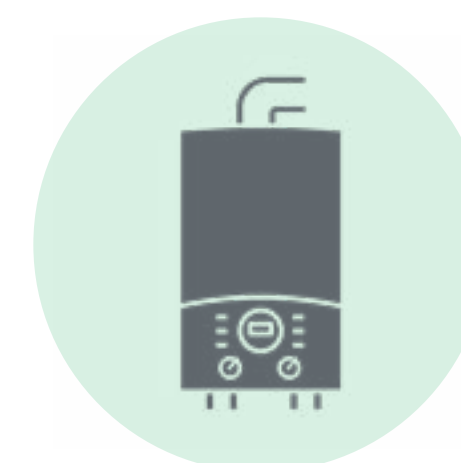

Interior and exterior lighting retrofit

ENERGY STAR® appliance upgrades

Lighting controller installation

Heat pump installation

Battery and EV charging stations
